 - Compressor and Internal Parts Insulated for Heat and Noise Reduction
 - All Panels Are Insulated for Extra Quiet Operation
 - 24-Hour Programming
 - Power Source: 115V/60HZ.
 - Rechargeable, R22

TEMPERATURE@LERT SPECIFICATIONS

TEMPERATURE@LERT monitors the ambient temperature and alerts you, and others, via email when it rises or falls outside your acceptable range. The temperature sensor is accurate to within $\pm 0.5^{\circ}\text{C}$ and can report temperatures from -40°F to $+200^{\circ}\text{F}$. Temperature@lert connects to your pc via an available USB port and runs as a windows service. Powered by your computer's USB port, it never needs new batteries or an AC power adapter. The customizable alert message can be sent continuously or just once when an alert is triggered. Real-time graphing and XML support provide you with the tools you need to integrate temperature readings into websites and other third party applications.

Temperature@lert Standard 3.0 features:

- Real Time Temperature Alerts
- Pre-Calibrated Sensor
- Runs as a Windows Service
- No Batteries or AC Power Required
- Includes Free Software Upgrades for 1 Year
- Logs temperature readings to text and XML log files
- XML files can be easily integrated into custom applications
- Real-time temperature graph

Temperature@lert 3.0 Standard Includes:

- USB Temperature Sensor
- Temperature@lert 3.0 Standard on CD-ROM
